Office Action Summary

## DETAILED ACTION

### *Election/Restriction*

1. Applicant's election without traverse of Group I, Claims 1-7, in Paper No. 6 is acknowledged.

### *Information Disclosure Statement*

2. Applicants' remarks about the information disclosure statement filed April 3, 2002 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 C(I).

### *Claim Rejections - 35 USC § 103*

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-7 are rejected under 35 U.S.C. § 103 as being unpatentable over USP 5938866 to Andersson et al.

6. The Andersson reference(s) disclose(s) the features including hardening the metal article with nitrogen gas, transporting the hardened metal article to the cooling chamber, cooling the hardened metal article with pressurized helium gas, transporting cooled metal article out of the cooling chamber (col. 4, line 57 to col. 6, line 56).

The difference between the reference(s) and the claims are as follows: with respect to instant claim 4, that Andersson does not disclose the heating temperature, but since the heating temperature is material dependent which is within ambit of ordinary skill artisan to select the known heat treatment temperature for the known metal material. It has been held that the invention within realm of performance of skilled artisan is not a patentable subject matter, In re Venner, 120 USPQ 192 (CCPA 1958).

*Response to Arguments*

7. Applicant's arguments filed April 3, 2002 have been fully considered but they are not persuasive.

8. Applicants argue that Andersson does not disclose heat treating a component in an atmospheric heat treating furnace. The examiner disagrees because Andersson does not disclose the hardening furnace is under pressure/vacuum.

*Conclusion*

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The above rejection relies on the reference(s) for all the teachings expressed in the text(s) of the references and/or one of ordinary skill in the metallurgical art would have reasonably understood or implied from the text(s) of the reference(s). To emphasize certain aspect(s) of the prior art, only specific portion(s) of the text(s) have been pointed out. Each reference as a whole should be reviewed in responding to the rejection, since other sections of the same reference and/or various combination of the cited references may be relied on in future rejection(s) in view of amendment(s).

All recited limitations in the instant claims have been met by the rejections as set forth above.
